Contents Vol. 155

Structural characterization of kerogen in 3.4 Ga Archaean cherts from the Pilbara Craton, Western Australia
C.P. Marshall, G.D. Love, C.E. Snape, A.C. Hill, A.C. Allwood, M.R. Walter, M.J. Van Kranendonk, S.A. Bowden, S.P. Sylva and R.E. Summons 1

Age, provenance and post-deposition metamorphic overprint of detrital zircons from the Nathorst Land group (NE Greenland)—A LA-ICP-MS and SIMS study
B. Dhuime, D. Bosch, O. Bruguier, R. Caby and S. Pourtales 24

Paleomagnetism and U–Pb geochronology of easterly trending dykes in the Dharwar craton, India: feldspar clouding, radiating dyke swarms and the position of India at 2.37 Ga
H.C. Halls, A. Kumar, R. Srinivasan and M.A. Hamilton 47

Geochemistry and zircon geochronology of the I-type high-K calc-alkaline and S-type granitoid rocks from southeastern Roraima, Brazil: Orosirian collisional magmatism evidence (1.97–1.96 Ga) in central portion of Guyana Shield
M.E. Almeida, M.J.B. Macambira and E.C. Oliveira 69

^{40}Ar–^{39}Ar age, geochemistry and Sr–Nd–Pb isotopes of the Neoproterozoic Lengshuiqing Cu–Ni sulfide-bearing mafic–ultramafic complex, SW China
W.-G. Zhu, H. Zhong, X.-H. Li, B.-G. Liu, H.-L. Deng and Y. Qin 98

Age and sedimentary provenance of the Southern Granulites, South India: U-Th-Pb SHRIMP secondary ion mass spectrometry
A.S. Collins, M. Santosh, I. Braun and C. Clark 125

The Coastal Terrane of the Kaoko Belt, Namibia: Outboard arc-terrane and tectonic significance
B. Goscombe and D.R. Gray 139

Adjacent terranes with ca. 2715 and 2650 Ma high-pressure metamorphic assemblages in the Nuuk region of the North Atlantic Craton, southern West Greenland: Complexities of Neoarchaean collisional orogeny
A.P. Nutman and C.R.L. Friend 159

The Jack Hills greenstone belt, Western Australia. Part 1: Structural and tectonic evolution over >1.5 Ga
C.V. Spaggiari 204

A non-marine depositional setting for the northern Fortescue Group, Pilbara Craton, inferred from trace element geochemistry of stromatolitic carbonates
R. Bolhar and M.J. Van Kranendonk 229

U-Pb zircon age of deformed carbonatite and alkaline rocks in the Pan-African Dahomeyide suture zone, West Africa
K. Attoh, F. Corfu and P.M. Nude 251

The Jack Hills greenstone belt, Western Australia. Part 2: Lithological relationships and implications for the deposition of ≥4.0 Ga detrital zircons
C.V. Spaggiari, R.T. Pidgeon and S.A. Wilde 261

The 1.75–1.68 Ga anorthosite-mangerite-alkali granitoid-rapakivi granite suite from the northern North China Craton: Magmatism related to a Paleoproterozoic orogen
S.-H. Zhang, S.-W. Liu, Y. Zhao, J.-H. Yang, B. Song and X.-M. Liu 287

doi:10.1016/S0301-9268(07)00100-3

Discussion

Comment on "Revisiting the "Yanbian Terrane": Implications for Neoproterozoic tectonic evolution of the western Yangtze Block, South China" [Precambrian Res. 151 (2006) 14–30]
M.-F. Zhou, J.-H. Zhao, X. Xia, W.-H. Sun and D.-P. Yan 313
Reply to the comment by Zhou et al. on: "Revisiting the "Yanbian Terrane": Implications for Neoproterozoic tectonic evolution of the western Yangtze Block, South China" [Precambrian Res. 151 (2006) 14–30] [Precambrian Res. 154 (2007) 153–157]
X.-H. Li, Z.-X. Li, J.A. Sinclair, W.-X. Li and G. Carter 318
The Gaojiacun intrusion: Rift- or subduction-related?. Comment on "Revisiting the "Yanbian Terrane": Implications for Neoproterozoic tectonic evolution of the western Yangtze Block, South China" by Li et al. (2006) [Precambrian Res. 151 (2006) 14–30]
M. Munteanu and Y. Yao 324
Understanding dual geochemical characters in a geological context for the Gaojiacun intrusion: Response to Munteanu and Yao's discussion [Precambrian Res. 154 (2007) 164–167]
X.-H. Li, Z.-X. Li, J.A. Sinclair, W.-X. Li and G. Carter 328
